Re: Custom Color Waiver Form (ISO Document # F-020) _____

Quest Construction Products (Hydro-Stop & United Coatings) would like to thank you for your continued business and specifically for the order that you have recently placed. You have requested a custom tinted color and we have carefully matched the color specified to our satisfaction.

Under normal circumstances, Quest Construction Products would ship a quart of the color requested to you for your approval, however we understand that given time constraints or for other reasons you have decided to forego this process and have requested that your order be completed using the color that in our opinion is a match. **Therefore; Quest Construction Products will not be responsible for the tinted product color if it is not satisfactory to the end user.**

By signing below, you agree to forego the quart sample process and would like Quest Construction Products to tint the appropriate products to match your requested color to the best of our ability.
